## Element Community Guide

*Welcome to the AI:AT community!*

*Here's how to quickly set up Element and get started 🚀*

### ✓ Install Element

Please install the Element Classic app on your laptop and your phone.

Download 

### ✓ Log In & Join the AI:AT Community Rooms

After installing, open the invite link to the AI:AT Community Space.

**Once inside, please join each room individually**

 Community Announcements

 17 Trainings & Events

 Community Chat

Click this [LINK](#) to become a part of the AI:AT-Community and stay connected to our ecosystem.

### ✓ Verify Your Devices

To avoid message or history issues, Element needs you to verify each new device.

*Best option: Install Element Classic on both your laptop and your phone. This makes verification easy because the devices can confirm each other. The browser version is not recommended, as it often causes verification problems.*

**If you only use one device (e.g., just your phone), you don't need to verify anything.**

How to verify:

**Settings → Security & Privacy → Verify this device**

Then approve it on your other device.

### ✓ Enable Notifications

Please enable notifications on your laptop and phone so you don't miss updates.

(On some devices you may also need to allow notifications in your system settings.)

**Just reply to your invite e-mail - we're happy to assist!**
